NEW DAM TO INCREASE FISH SUPPLY

The "Sarah" (Carp) Enterprise for exploiting waters in Osijek, Slavonia, will build a large dam of reinforced concrete in a branch of the Old Drava. The dam will maintain a constant depth of 1.5 meters in the Old Drava - Sava - Polje - Erdi Aljmaš sector. About 300 jutro of water will thus be made available for growing fish. The "Sarah" Enterprise will stock the water with about a carload of carp fry.

At least 30 carloads of fish are expected to be harvested from this backwater this year, as compared with about eight carloads of first-grade carp last year. Fish from the new pond will be distributed among 9 areas, 6 cities, and 5 workers' supply services in large industrial enterprises.

A number of fishing cooperatives have sprung up along the Drava as far as the mouth of the Mur. This year the "Saran" Enterprise will open a workshop for building motorboats and other fishing vessels.
